

DRAGON 1000

INFLATABLE LIGHT TOWER

- HARDSHELL CASE
- 1000 WATT LAMP
- RECEIVER MOUNT
- TROLLEY WHEELS

PORTABLE EMERGENCY LIGHTING AND TRAFFIC SIGNAGE

With the optional receiver hitch mount one person can easily transport the tower by hand using the built-in trolley wheels.

The Dragon Light tower can be carried and deployed from any vehicle with a receiver hitch, or permanently installed on most work vehicles.

Our latest model features a sturdy, built-in hardshell case for extra protection, while also serving as a convenient platform for mounting on the receiver hitch mount or securing the tower to utility, fire, trucks, and other emergency vehicles.

The wheels on the optional receiver hitch mount make transport an easy task, and mounts quickly to most vehicles for carrying and deployment.

The 1000 watt metal halide lamp system provides an incredible 107,000 Lumens of light power...enough power to read text over 40 paces in all directions! The system can be used with any vehicle electric system (using an inverter) or plugged into standard AC power.

Setup is easy...one person - one minute!

Height	14 ft
Weight (w/o hitch mount)	56 lbs
Fan Power	115V, 4.5 Amps
Light Power (Watts)	1000 Watt
Total Power	1600 watt
