

# Beacon 20 (ABT20)

REV 1.0  
093013

Our newest model is a more portable version of the Beacon 24. It's visible from miles away, its light is so bright you can read text 120+ feet in all directions...and at the same time lifts your radio, cell phone repeater, or video camera. All with 5 minutes setup time!

The Beacon comes configured with either a 600 watt, 65,000 lumen MH light or a dim-mable 1000 watt light that can produce up to 105,000 lumens. This Beacon will carry in a shoulder bag and includes foldout legs that can be sandbagged or staked down for fast setup stability.

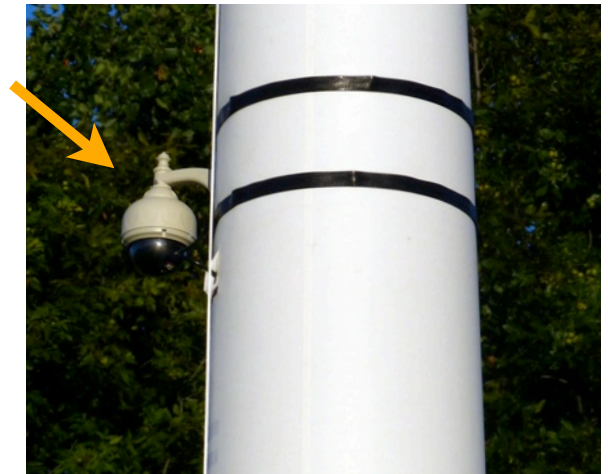

This economical tower inflates in just 30 seconds using a powerful 1 HP blower. It operates somewhat differently to the AIR Tower series...the blower runs continuously to keep the tower inflated while at the same time keeping the high-powered light system cool.

- Highway Emergencies
- Expressway Night Work
- Search & Rescue Teams
- Disaster Relief Agencies
- Special Event Signpost
- Construction Site Lights

Shown with 1000 watt metal halide lamp, mounted 12 ft off the ground - enough light for detail work 40 feet away. Sets up in minutes to light your emergency site.

<b>Height</b>	20 ft (7.3 m)
<b>Base Diameter</b>	29 in (89 cm)
<b>Top Diameter</b>	16 in (35.5 cm)
<b>Top Pocket Payload</b>	2 lbs (1.15 kg)
<b>Weight (w/legs)</b>	54 lbs (25 kg)
<b>Inflation Time</b>	30 sec
<b>Lamp Illumination</b>	50,000-107,000 lum
<b>Blower Electrical</b>	110VAC, 6A
<b>Lamp Electrical</b>	110VAC, 9.5A

The portable Beacon 20 comes with a shoulder bag or an optional hardshell case.

Four built-in steel legs, fold out from the base for staking or sandbagging the base.

Ask about our new WiFi-connected security camera that mounts on the Beacon 20...or any of our towers. Affordable Hi Def action!
